

Why St. John School?

St. John provides a quality Catholic education with a daily religious curriculum that's rich with spiritual experiences.

ELA courses stimulate imagination, communication, and critical thinking skills.

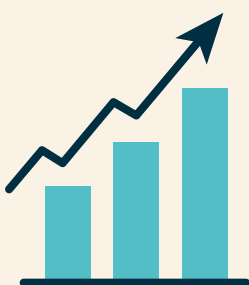

Students read across the curriculum for word recognition and understanding.

Students learn to share ideas in writing through fun creative projects.

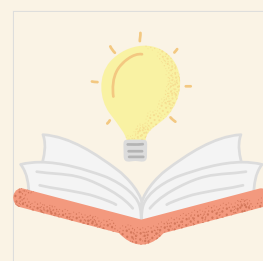

Our Math and Science courses teach the application of skills students need to become critical thinkers and problem solvers.

Students bring their concepts to life through technology or project based learning to understand the impact of the world around them.

Programs like Accelerated Reader and Reflex Math allow students to measure their progress in real time.

Students may participate in our Learning Coach Program for extra support in all subjects.

A dyslexia lab is on campus to provide students with strategies to be successful in the classroom.
